Michael Azlen is a senior investment professional with 25 years of industry experience including the founding, growth and sale of a regulated investment management business.

After a 15 year career spanning two Canadian banks and several alternative asset management companies, Mr. Azlen founded Frontier Investment Management in 2005 and grew the business to profitability before selling the business to a public company in 2013 and completing his earnout in 2016.

Michael then focused on research into climate change and impact investment strategies. As we have seen from recent record-breaking heatwaves and increased incidences of drought/wildfires, our climate is changing rapidly due to human generated emissions. The next 10 to 20 years are the most important period for mankind to make substantial and sustainable emissions reductions and the urgency of this objective cannot be overstated as the potential negative impacts to society are immense.

Michael formed Carbon Cap Management LLP in 2018 as an environmental asset manager focused on climate change and launched the World Carbon Fund in February 2020. The fund invests into multiple liquid and regulated carbon markets and aims to generate strong uncorrelated returns and a direct impact on carbon emissions. Carbon Cap's mission is to raise awareness about climate change and to provide solutions directly related to the capping and reduction of carbon dioxide emissions.

Mr. Azlen holds a Sloan Masters Degree in Leadership and Strategy from London Business School and is a Chartered Alternative Investment Analyst (CAIA) and has completed the LSE's "Economics and Governance of Climate Change" course.

Mr. Azlen is a regular speaker at investment conferences and has been a guest lecturer on the graduate degree programs at London Business School for more than 15 years.
